

KNIFESTYLES OF THE RICH & FAMOUS

FOREHEAD
"Cheryl has no frown lines and very mild crow's-feet," notes Beverly Hills plastic surgeon Dr. Josef Hadeed. "She likely had Botox [\$2K per year] to minimize wrinkles in these areas."

EYES
"She may have had surgery to remove excess skin from her upper eyelids," says Dr. Hadeed. "She has less skin there than 15 years ago." Price? From \$5,500 to \$8,500.

CHEEKS
"Her cheeks appear fuller now than when she was younger, indicating she may have had fillers," shares Dr. Hadeed. Replacing cheek volume with fillers runs \$3,000 and up.

JAWLINE
"There's very little sagging of her neck [unusual for someone who's 64], which may be the result of Ultherapy to maintain tight skin," says Dr. Hadeed. Treatments cost up to \$5K.

Cheryl's Heavenly Upkeep

2001

NOW

She's no ordinary angel! Thirty-nine years after joining the iconic *Charlie's Angels* series, Cheryl Ladd continues to stun audiences with her youthful beauty — most recently during elegant appearances on *The People v. O.J. Simp-*

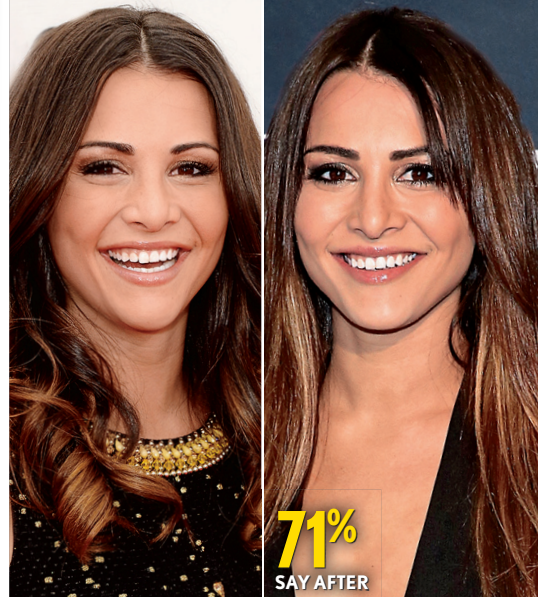

son: American Crime Story. Even in Ultra HD TV, the 64-year-old's skin still appears smooth and supple, her eyes wide and bright and, other than a few crinkles at her crow's-feet, wrinkles are nonexistent. "Whatever work Cheryl has had done is very

subtle," notes Beverly Hills plastic surgeon Dr. Josef Hadeed, who has never treated the star. "She does not look drastically different and yet has maintained a refreshed, rejuvenated look." But given how much time has passed since former pin-up

Cheryl's heyday, it seems likely that the two-time author *has* had some help from a surgeon or a dermatologist. Besides seeing evidence of skillful Botox and fillers in her cheeks, Dr. Hadeed believes the gorgeous grandmother may have had an up-

per eye-lift. "In her earlier photo, the upper lids appear to have more skin — especially on the lateral aspects," he explains, "while now her eyelids don't appear to be as heavy." Either way, Cheryl looks as close to ageless as humanly possible! **LS**

The Man's View

BEFORE OR AFTER APPARENT NOSE JOB?

Andi Dorfman

The former *Bachelorette* isn't fading into the woodwork — or leaving her looks to chance! As the 28-year-old prepares to release her memoir, *It's Not Okay*, in May, she's also attracting attention for her possible rhinoplasty. "Her nose is slightly thinner and the tip more refined, with less flare to her nostrils," notes NYC plastic surgeon Dr. Michelle Copeland. Fortunately, the tweak wasn't a thorny issue for men we polled. The majority said the single lady's new nose was coming up roses.

MIRACLE IN A BOTTLE

NO-KNIFE EYE-LIFT
Talk about eyebrow-raising! Luxury skincare line La Mer taps its "Stretch Matrix" complex to visibly support the "architecture" of the eye and brow area in this new lifting serum. Sea botanicals also amp elastin production for long-term results.
